

THE NATIONAL PATIENT-CENTERED CLINICAL RESEARCH NETWORK

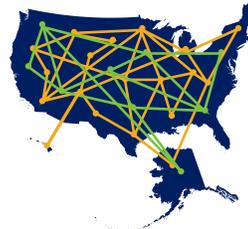

PCORnet is a PCORI initiative designed to empower people to make informed healthcare decisions by enabling clinical research that is faster, easier, less costly and, most importantly, more relevant to their needs. At the same time, it is engaging stakeholders from across the healthcare community in productive research partnerships.

PCORnet offers the means for researchers to securely access information on the health experiences of tens of millions of patients across hundreds of healthcare organizations. It is tapping resources such as electronic health records (EHRs), insurance claims, and outcomes reported by patients to power robust, real-world clinical research. Patients have a strong voice in determining what topics will be studied and how.

PCORnet is a collaborative national resource for better research...

...with sites and partners in every state...

...that assures the protection of patients' privacy and data security.

ACCOMPLISHMENTS TO DATE

PCORnet has created a distributed research network that unites patients, clinicians, health systems, and health plans in an effort to expedite research that can improve health care and patient outcomes. PCORnet represents:

- About **110 million** patients who have had a medical encounter in the past five years*
- **33** engaged and collaborating partner networks
- **130+** partnerships with health systems and patient groups
- **150+** common and rare conditions
- **\$50 million** in PCORI-approved funding to support demonstration projects

*Some individuals may have visited more than one network partner

ENGAGEMENT

PCORnet empowers patients' involvement in all phases of research, making sure projects focus on what matters most to patients and caregivers. PCORnet allows often-ignored conditions and populations to be studied.

PCORnet's Front Door allows researchers to access its data and resources, including submitting queries to plan future research projects.

PCORnet research drives for high-quality insights to inform clinical best practices and empowers clinicians and their patients to make informed, evidence-based healthcare decisions.

PCORnet enables health systems to conduct agile research that leverages EHR data and other health systems-based data sources.
