

Study Title

Principal Investigators, Associated Organizations

Background

- Description of health issue/problem statement
- Essential definitions, clarifications
- Why is this research necessary?

HEALTH *in*
Our HANDS

Research Objectives

Patient-Centered Goals

- How does this study benefit affected parties?
- What can researchers expect to learn from the results?
- What does this mean for patients?

Description of Patient Population

Data Overview

- Sources & collection methods
- Types of data collected

Recruitment Overview

- Participation qualifications
- Recruitment strategies/locations
- Sources of prospective participants

Participant Experience

- What is asked of participants?
- What are the risks/benefits of participation?
- What kind of compensation is offered to participants?

Stakeholder Engagement

- Who are the stakeholders?
- What do the engagement activities consist of?
- When/how will engagement activities take place?

Dissemination and Follow-up

- Who are the target recipients of the results?
- What do you consider the most effective strategies for distribution of research findings?
- Is there any other follow-up communication required?

Recap of Implications

- How will the results benefit participants, other patients, and providers?
- How does this study contribute to the larger understanding of the health issue?
