PCORnet[®] Network Partner in REACHnet since 2023

The purpose of this Site Profile is to provide an overview of the basic research processes at DHR Health Institute for Research and Development. This profile can help you understand: the types of patients within the electronic medical records; current PCORnet[®] Study participation; patient recruitment methods and institutional procedures related to Institutional Review Board and contracting; and data linkages.

Table 1. Characteristics of the patient population between January 1 – December 31, 2024

The characteristics of the patient population presented in this table are based on data from the health system's electronic health records mapped to the PCORnet[®] Common Data Model as of September 2025 and do not reflect any public-facing or official characteristics reported by the health system or its partners. This data can be used to help inform researchers of the types of patients, care settings, and location data that are available for research.
