

PCORnet®, The National Patient-Centered Clinical Research Network

PCORnet® is intended to improve the nation's capacity to efficiently conduct patient-centered health research, particularly comparative clinical effectiveness research (CER), by providing a large, highly representative network of health data, research expertise, and patient insights. PCORnet has been developed with funding from the Patient-Centered Outcomes Research Institute® (PCORI®).

 Your Research Need: Connections with IRB-maintaining sites for your funded study Preliminary data to help design proposals or assess study feasibility Partners to co-design research Perspectives from people with lived expertise	 The PCORnet Solution: PCORnet® Clinical Research Networks that can participate as clinical sites in randomized research trials Preexisting standardized, research-ready data from everyday healthcare encounters with more than 50 million people across the U.S. each year Access to premier research experts across the country to assist with studies Insights from actively engaged patients, caregivers, and advocates
--	---

NETWORK OF NETWORKS

Each year, PCORnet connects researchers with health data from more than 50 million people nationwide through 8 PCORnet® Clinical Research Networks, enabling large-scale, innovative, patient-centered health research.

PCORnet® DELIVERS FASTER, MORE MEANINGFUL RESULTS

Study Title	Study Question	Result
 ADAPTABLE STUDY Funder: Patient-Centered Outcomes Research Institute® (PCORI®)	Which dose of aspirin, 81 mg or 325 mg, is best to lower the risk of heart attack or stroke?	15,000+ patients from 40 sites over 38 months Named by the Clinical Research Forum as a Top 10 Clinical Research Achievement for 2022 Results were published in the <i>The New England Journal of Medicine</i>
 PREVENTABLE STUDY Funder: National Institutes of Health (NIH)	Can taking a commonly used heart medication lower the risk for dementia in patients aged 75+?	Largest trial to date in people age 75+ Over 10,000 enrolled so far, with a goal to include up to 20,000
 GREENLIGHT PLUS STUDY Funder: Patient-Centered Outcomes Research Institute® (PCORI®)	Can adding a digital component to pediatric counseling effectively reduce obesity in children?	Followed 900 parent-infant pairs across six U.S. medical centers for two years Lower average weight-for-length trajectory 41% lower obesity rate Results were published in <i>JAMA</i>

HARNESSING REAL-WORLD DATA WITH A SIMPLE, SECURE PROCESS

Requestor queries are sent to the data—and answers, not data, are sent back to Requestors.

PCORnet resources are available to researchers, patient groups, industry, and agencies from all funding sources and affiliations. PCORI also offers funding for broad pragmatic studies using PCORnet.

Are you ready to find out how PCORnet can support your next research effort? Contact the PCORnet® Front Door to start the conversation.

PCORnet is a national resource, funded by PCORI, that enables insights from high-quality health data, patient partnership, and research expertise to deliver fast, trustworthy answers that advance health outcomes. The network supports both observational and interventional research.
